

In the case report “Hand, foot, and mouth disease with exuberant presentation in an adult: case report” with DOI: 10.24875/PJDV.24000003, there was an error in the positioning of the Figs. 2-5 and their captions. Below, the correct placement and captions for the figures are provided:

Figure 2. Vesicles, erythematous macules, erythematous papules, and crusts on the dorsum of the feet and palms (day 2).

Figure 4. Dissemination of papules and vesicles with a violaceous colour on the antecubital fossa, elbows, knees and thighs (day 5).

Figure 3. Erythematous papules and papulovesicles, some exulcerated, on the dorsum of the hands and soles (day 3).

Figure 5. Necrosis of keratinocytes in the upper portion of the epidermis also shows spongiosis and lymphocytic exocytosis (H&E – $\times 100$).
